HERO SECTION

Powering Odisha with Smarter Solar Energy

Engineering-Led Solar EPC Solutions Since 2016

Fivefold Renewable Pvt. Ltd. is a solar EPC company specialising in high-performance rooftop solar systems engineered for long-term reliability and predictable financial returns.

From residential rooftops to commercial, industrial and institutional projects, we design, execute and optimise solar assets with engineering discipline, structured risk mitigation and long-term performance accountability.

10+ Years of Renewable Energy Experience | 20+ MW Industrial & Commercial Rooftop Solar Installed | 30+ Industrial & Institutional Projects Delivered | 800+ MW Cumulative Design, Engineering & Consultation Experience

Government Scheme Execution | End-to-End EPC | Professional Installation | Long-Term Performance Support

ABOUT US

About Fivefold Renewable Private Limited

Fivefold Renewable Pvt. Ltd. is a solar EPC company specialising in high-performance rooftop solar systems engineered for long-term reliability and predictable financial returns.

With **10+ years of experience in the renewable energy industry**, Fivefold has installed **20+ MW of industrial and commercial rooftop solar systems** and delivered **30+ industrial and institutional projects**.

The company has **800+ MW of cumulative design, engineering and consultation experience**, with multi-regional execution experience across **10+ states**.

Our capabilities extend across feasibility assessment, site analysis, system design, engineering, procurement, installation, commissioning and long-term performance support.

We work with developers, EPCs, businesses, institutions and property owners to engineer solar plants focused on **generation, reliability, constructibility and long-term returns**.

Our Approach

We do not sell drawings. We engineer bankable solar plants.

WHY CHOOSE FIVEFOLD

Why Fivefold Renewable?

- **10+ Years** of Renewable Energy Industry Experience
 - **500+ Residential Rooftop Solar Systems Installed**
 - **20+ MW** Industrial & Commercial Rooftop Solar Installed
 - **30+** Industrial & Institutional Projects Delivered
 - **800+ MW** Cumulative Design, Engineering & Consultation Experience
 - **10+ States** of Multi-Regional Execution Experience
 - Engineering-Led Solar EPC Approach
 - Government-Backed Scheme Execution Experience
 - Tier-1 Solar Components
 - Experienced Engineering & Execution Team
 - Structured Quality Assurance Processes
 - End-to-End Project Execution
 - Long-Term O&M and Performance Support
-

ENGINEERING CAPABILITY

Engineering Determines Performance

Most solar plants do not underperform because of poor equipment. They underperform when engineering is treated as a mere formality.

Standardised layouts, incomplete site assessment, CAPEX-driven electrical decisions and critical assumptions that go unchallenged can ultimately affect decades of solar plant performance.

At Fivefold, we engineer performance before construction begins — balancing **generation, reliability, constructibility and long-term returns**.

Pre-Construction Engineering

- Feasibility Reports & Shadow Analysis
- 3D Layout & Capacity Estimations
- PVsyst Yield Simulations
- Bankable DPR Preparation
- Financial Modelling
- Constructibility & Risk Review

Detailed Execution Engineering

- Detailed Execution Planning
- Structural Engineering
- Detailed Engineering & Drawings
- Permits & Approval of Drawings
- Installation & Commissioning
- Performance Assurance

Procurement & Quality Control

- Tier-1 Components
- Strong Procurement Networks with Direct Manufacturers & Suppliers
- Experienced Team with Pre-Defined Execution SOP
- Third-Party Quality Assurance
- Compliance & Testing Processes
- Documentation & Traceability

Advanced EPC Strategies

- Turnkey Rooftop EPC
- Detailed Engineering & Drawings
- Material Benchmarking & QA
- Installation & Commissioning
- Permit & Approval Support from Government Officials / DISCOM
- Performance Assurance

Long-Term Performance Support

- O&M Framework
- Remote Monitoring
- Preventive Maintenance Planning
- Performance Diagnostics
- Asset Life Optimisation

Our Engineering Philosophy

We do not fill roof space with solar modules. We engineer, analyse and design solar plants to perform for 25–30 years.

OUR SERVICES

Residential Rooftop Solar

Generate your own electricity with a professionally engineered rooftop solar system for your home.

Fivefold provides end-to-end support covering site assessment, system design, installation, applicable government scheme assistance, commissioning and long-term technical support.

Commercial Solar Solutions

Customized solar solutions for commercial establishments designed around energy requirements, available space, system performance and long-term returns.

Suitable for:

- Offices
 - Retail Outlets
 - Hotels
 - Hospitals
 - Educational Institutions
 - Commercial Buildings
-

Industrial Solar Solutions

High-capacity solar solutions for factories, warehouses, manufacturing units and other industrial facilities.

Our engineering-led approach focuses on:

- System optimisation
 - Generation performance
 - Structural requirements
 - Electrical engineering
 - Reliability
 - Long-term performance
-

Solar System Maintenance

Professional solar maintenance and performance support to help systems operate efficiently throughout their lifecycle.

Services include:

- Preventive Maintenance
 - System Inspection
 - Solar Panel Cleaning
 - Performance Monitoring
 - Energy Generation Analysis
 - Inverter Health Checks
 - System Diagnostics
 - Technical Support
-

GOVERNMENT-BACKED SOLAR SCHEMES

Solar Solutions with Government Scheme Support

Fivefold has executed projects under government-backed schemes, including **RTS 1** and **RTS 2**, and supports customers with applicable government solar programmes.

For eligible residential customers, Fivefold also assists with the applicable **PM Surya Ghar Muft Bijli Yojana** process.

PM Surya Ghar Muft Bijli Yojana

The PM Surya Ghar Muft Bijli Yojana is a Government of India initiative supporting eligible residential consumers in adopting rooftop solar.

Fivefold can assist eligible customers with:

- Eligibility-related guidance
- Documentation Support
- Solar System Planning
- Installation
- Application-Related Assistance
- Net Metering Support

Benefits of Rooftop Solar

- Government Financial Assistance for Eligible Customers
- Reduced Dependence on Grid Electricity

- Clean Renewable Energy
- Long-Term Energy Savings
- Greater Energy Independence
- Net Metering Support

Note: Eligibility, subsidy amount, application procedure and scheme availability are subject to prevailing Government of India guidelines.

HOW WE WORK

Our Process

01 — Site Assessment

We assess the site, available rooftop area and project requirements.

02 — Energy Requirement Assessment

We evaluate the project's energy consumption and requirements.

03 — Solar System Design

Our engineering team develops a system configuration based on site and energy requirements.

04 — Proposal & Documentation

We provide the project proposal and assist with applicable documentation and government scheme processes.

05 — Procurement & Installation

Components are procured and the system is installed according to the approved engineering design.

06 — Net Metering Support

We assist with the applicable net metering process.

07 — Testing & Commissioning

The completed system undergoes testing and commissioning before being put into operation.

08 — Performance & After-Sales Support

We continue supporting the system through maintenance, monitoring and technical assistance.

ROOFTOP SOLAR PROJECT CREDENTIALS

Key Installations Across India

Fivefold's project credentials include commercial and industrial rooftop solar installations across multiple regions.

LONG-TERM PERFORMANCE SUPPORT

We Stay With You After Installation

Solar performance depends not only on installation but also on continued monitoring and maintenance.

Fivefold's long-term support capabilities include:

- O&M Framework
 - Remote Monitoring
 - Preventive Maintenance Planning
 - Performance Diagnostics
 - Energy Generation Analysis
 - Solar Panel Cleaning
 - Inverter Health Checks
 - Earthing Inspection
 - Lightning Protection Inspection
 - Structure Inspection
 - Cable & Connector Inspection
 - Remote Technical Support
 - Warranty Claim Assistance
 - Asset Life Optimisation
-

SOLARCARE AMC

Protect Your Solar Investment

Fivefold SolarCare provides structured maintenance support for customers looking to maintain system performance over the long term.

SolarCare Essential

1 Year

Routine preventive maintenance and inspection support.

SolarCare Plus

3 Years

Extended maintenance support with enhanced monitoring and priority service.

SolarCare Premium

5 Years

Comprehensive preventive maintenance, cleaning, diagnostics and priority support.

SolarCare Elite

10 Years

Long-term maintenance support with technical consultation, health audits and dedicated service support.

AMC scope and pricing should be confirmed with Fivefold Renewable before publication.

WARRANTY SUPPORT

Built for Long-Term Performance

Solar is a long-term investment. Fivefold provides warranty and technical support throughout the applicable warranty period.

Support Includes

- System Warranty Support
- Solar Panel Manufacturer Warranty Support
- Inverter Manufacturer Warranty Support
- Installation Workmanship Support
- BOS Component Warranty Support
- Warranty Claim Assistance
- Technical Support

Warranty duration and terms depend on the respective manufacturer, product specifications and applicable Fivefold warranty terms.

FAQ

How much can I save with rooftop solar?

Your savings depend on electricity consumption, system capacity, tariff, rooftop conditions and system generation. A properly designed solar system can significantly reduce your dependence on grid electricity and monthly electricity expenses.

Do you provide subsidy assistance?

Yes. Fivefold assists eligible residential customers with the applicable PM Surya Ghar Muft Bijli Yojana process and related documentation.

How long does solar installation take?

Installation timelines depend on system size, site conditions, approvals, material availability and project requirements.

Do solar panels work during cloudy weather?

Yes. Solar panels can continue generating electricity during cloudy conditions, although generation may be lower than under clear-sky conditions.

What maintenance does a solar system require?

Regular cleaning, preventive inspection and performance monitoring help maintain system efficiency and reliability.

Do you provide net metering support?

Yes. Fivefold provides support for the applicable net metering process.

AREAS WE SERVE

Our Service Locations

Fivefold currently serves customers across Odisha, including:

- Bhubaneswar
- Cuttack
- Bhadrak
- Balasore
- Jajpur
- Nayagarh

With **multi-regional execution experience across 10+ states**, Fivefold has the capability to execute solar projects across multiple regions of India.

CONTACT

Let's Build Your Solar Future

Whether you're planning a residential rooftop solar system, a commercial installation or an industrial solar project, our team is ready to help you design and execute a solar solution built for long-term performance.
